

# DALLAS-FORT WORTH MARKET TAPESTRY

For more than 30 years, companies, agencies, and organizations have used segmentation to divide and group their consumer markets to more precisely target their best customers and prospects. This targeting method is superior to “scattershot” methods that might attract these preferred groups. Segmentation explains customer diversity, simplifies marketing campaigns, describes lifestyle and lifestage, and incorporates a wide range of data. Segmentation systems operate on the theory that people with similar tastes, lifestyles and behaviors seek others with the same tastes—“like seeks like.” These behaviors can be measured, predicted, and targeted.

## MARKET TAPESTRY

The market tapestry is a fascinating snapshot of lifestyle choices. Based on demography and geography, the main purpose of this type of data is targeted marketing efforts, but the high-level picture of types of neighborhoods and the people who live in them based on the activities and expenses of those people is a compelling story all on its own. Some segments develop as a result of age, some show up as a result of money, and still others result from ethnic influence.

ESRI’s **Tapestry Segmentation**, shown on the map below, combines the “who” of lifestyle demography with the “where” of local neighborhood geography to create a model of various lifestyle classifications or segments of actual neighborhoods with addresses—distinct behavioral market segments. To create this map, U.S. residential areas are divided into 65 distinctive segments based on socioeconomic and demographic characteristics to provide an accurate, detailed description of U.S. neighborhoods. These segments are then grouped into the 12 Tapestry Segmentation LifeMode Summary Groups, which are characterized by lifestyle and lifestage, and share an experience such as being born in the same time period or a trait such as affluence.

	MEDIAN HOUSEHOLD INCOME	POPULATION	PERCENTAGE OF DFW POPULATION
<b>AFFLUENT ESTATES</b> Established wealth—educated, well-traveled married couples	\$97,900 - \$160,800	916,449	17.6%
<b>UPSCALE AVENUES</b> Prosperous, married couples in higher density neighborhoods	\$84,900 - \$104,800	148,788	2.9%
